6" Fractional Dial Caliper **in Stock NOW!**

Item Number 19051
UPC 766565190517

Product Name 6" Fractional Dial Caliper
Description

This fine quality 6" caliper is ideal for woodworkers, with its large, easy to read dial (1 3/8" diameter). Unlike digital calipers, **there is no battery to run down and it does not round fractions!** You may soon find it becomes your favorite measuring tool!

The outer ring is calibrated in 64ths of an inch, and shows increments in familiar fractions. The inner ring reads in hundredths of an inch, and reads 1" per revolution on the dial. Ideal tool for your machine work, and precise measurements of depth, thickness, and distance. Made of stainless steel.

Boxed Dimensions
