### GLUE SPREADERS

These glue spreaders were lifted from the general craft market, where they are used to apply glue to felts, paper, cardboard, etc; or for working with thick paints to create special patterns. The tip is flexible and can be used with various amounts of pressure. Dried glue just chips off the polypropylene plastic, making them easy to clean for reuse. 6" long -set of 6.

Item #: 19118

UPC: 766565191187

3 new products added to our extensive line of **CROWN TOOLS** from *Sheffield, England*
